Heavy duty design offers maximum payload and safe operation

The DW60 combines the power of a hydrostatic transmission Tier 4 Final Perkins engine with an industry leading, heavy duty design. With massive, impact-resistant box sections, this power swivel dumper offers high performance and a bucket engineered for durability. The DW60 is well balanced and easily moves its rated payload across the varying terrains of a job site. Full-time four-wheel drive ensures optimum maneuverability in difficult conditions.

- Operator station is easily accessible from both sides for added convenience. Dash board displays a full range of dials/indicators lights such as fuel gauge, low fuel warning light and parking brake light.
- Hydrostatic drive is easy and intuitive for the operator. The four-wheel drive provides perfect traction in difficult terrain, and articulated steering allows for a tight turning radius
- Swivel bucket allows material to be unloaded on either side of the unit for added versatility
- A top speed of 16mph/25kmh provides for fast cycle times and efficiency
- Awning and cab options available
